- Integrated designs and business requirements into CMS and ecommerce platforms such as WordPress, Shopify, eBay & Amazon
- Developed modern, responsive, lightning-fast websites

PROJECTS

DevConnector — MERN Full Stack: Front to Back

Built a social network - developer community with MongoDB, Express, React, Redux & Node.js and deployed the full stack application to Heroku. MEAN stack cut latency by 40% and increased effectiveness of database administrators by 20%.

- Built an extensive backend API with Node.js & Express
- Protected routes/endpoints with JWT (JSON Web Tokens)
- Extensive API tested with Postman
- Integrated React with our backend in an elegant way
- Created a workflow & Building frontend to work with the REST API
- Used Redux for app state management
- Created reducers and actions for our resources
- Created many container components that integrate with Redux
- Tested with the Redux Chrome extension
